EDUCATION

B.Tech in Computer Science — GLA University, Mathura *Aug 2023 – May 2027*

CGPA: 7.83 (Ongoing) | Relevant Coursework: DSA, DBMS, OOP, Computer Networks, OS

Intermediate — N.R. Public School, Khurja *Apr 2022 – Mar 2023*

Percentage: 77%

High School — N.R. Public School, Khurja *Apr 2020 – Mar 2021*

Percentage: 95.4%

TECHNICAL SKILLS

- **Languages & CS Fundamentals:** Python, JavaScript (ES6+), Java (OOP), SQL, Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks
- **AI & LLM Integration:** LLM APIs (Gemini, NVIDIA NIM), TensorFlow.js, REST-based AI microservice integration
- **Backend & APIs:** Node.js, Express.js, REST APIs, Socket.IO, WebRTC, BullMQ
- **Databases:** MongoDB (NoSQL), MySQL (SQL), Redis
- **Frontend:** React.js, Redux Toolkit, Tailwind CSS, Responsive Web Design
- **Tools & DevOps:** Git/GitHub, GitHub Actions (CI/CD), Docker, Jest(TDD), Nginx, Postman
- **Cloud:** Microsoft Azure

PROJECTS

SwiftChat — AI-Powered Real-Time Chat Application .....Link *Apr 2026*

Python (FastAPI) · Node.js · Express.js · React.js · MongoDB · Redis · Docker · REST APIs · Git

- Built SwiftChat, an AI-orchestrated real-time chat platform where a multi-model AI assistant (ARIA) helps users converse, search chats by meaning, and get automatic image insights.
- Built a full-stack chat application with RESTful APIs, JWT authentication, and Socket.IO real-time messaging; containerized with Docker and deployed via a CI/CD pipeline (GitHub Actions).
- Designed and integrated 5+ Python (FastAPI) microservices over REST, applying OOP principles for clean, modular service design across the codebase.

LiveTruth — Real-Time AI Fact-Checking Agent .....Link *Jan 2026*

Node.js · Express.js · MongoDB · REST APIs · BullMQ · Git · GitHub Actions · Jest(TDD)

- Built LiveTruth, a real-time fact-checking app that transcribes live speech, detects factual claims, and verifies them against Google, Wikipedia, and an LLM reasoning layer to return instant, source-backed verdicts.
- Designed a credibility-scoring REST API handling concurrent requests across 15+ endpoints, maintaining 99%+ uptime through async job queues (BullMQ) and resilient error handling.
- Cut redundant API calls by ~60% via a semantic-caching layer; wrote Jest (TDD) test suites and automated the CI/CD pipeline with GitHub Actions for consistent code quality.

InTouch — AI-Powered Video Interview Platform .....Link *Jun – Jul 2025*

React.js · Node.js · MongoDB · WebRTC · TensorFlow.js · JWT · Agile (Team Project)

- Built InTouch, an AI-powered video interview platform that uses live face and eye tracking to score candidate attention and flag engagement risk during interviews in real time.
- Integrated TensorFlow.js behavioral analytics into the backend pipeline, cutting manual review time by 30% through automated, data-driven scoring.
- Built role-based access control with JWT and a live risk-scoring dashboard in a team-based Agile workflow (sprint planning, stand-ups, Git branching).

TRAINING & EXPERIENCE

Full-Stack Development Trainee — W3Grads (MERN Stack) *Jun – Jul 2025*

- Completed intensive end-to-end SDLC training — coding, debugging, testing, and cloud deployment; delivered InTouch as a capstone project using Agile/Scrum practices.

Virtual Internship — JP Morgan Chase & Deloitte (Forage) *Apr 2026*

- JP Morgan Chase: REST API design patterns and event-driven architecture. Deloitte: enterprise debugging workflows and structured software delivery practices.

ACHIEVEMENTS & CERTIFICATIONS

- **Top 0.15% Nationally** — Adobe India Hackathon 2025: Ranked ~4,000 / 2,62,153 participants.....Link
- **Top 5 Finalist** — HackCentrix 2026 (National Hackathon, GDG on Campus GLAU × Hack2Skill).....Link
- **Full-Stack Developer Certificate** — W3Grads (MERN Stack).....Link
